

RANA AMAN *AI & Machine Learning Specialist* [City, State] | [Phone] | [Email] | [GitHub/Portfolio Link]

AI MATCHING CONFIDENCE: 96% *Matches 5/5 Core Requirements: YOLOv8 Expertise, Flask Integration, Smart City Projects, OpenCV Proficiency, and MCA Background.*

PROFESSIONAL SUMMARY

Innovative AI Specialist with an MCA (AI & ML) specialization. Expert in developing high-performance Computer Vision applications, from **CityGuardian AI** (Surveillance) to **Sentinel Forensics** (Deepfake Detection). Proficient in deploying production-grade Flask backends with modern, interactive frontends.

CORE COMPETENCIES

- **AI/ML:** Object Detection (YOLOv8), Image Segmentation, TensorFlow, Keras.
- **Full-Stack:** Flask (Backend), Glassmorphism UI, HTML5/CSS3.
- **Libraries:** OpenCV, NumPy, Pandas, Scikit-learn.
- **Platforms:** Render (Deployment), Git/GitHub, VS Code.

KEY PROJECTS

CityGuardian AI (Smart City Surveillance)

- Designed a real-time traffic monitoring system capable of vehicle detection and violation reporting.
- Implemented an automated incident logging dashboard using Flask and OpenCV.

Sentinel Forensics (FakeGuard AI)

- Engineered a deep-learning platform to distinguish between real and AI-generated media.
- Integrated high-fidelity Lottie animations and a "Glass-Card" UI for an enhanced user experience.

AuraHire AI (ATS-Pro)

- Developed a resume screening tool that predicts candidate potential using NLP and skill-gap analysis.

EDUCATION

- **Master of Computer Applications (MCA) in AI & ML**
 - Chandigarh University | **SGPA: 8.70**
