

RANA ROHAN *Full Stack Developer / AI & ML Enthusiast* [LinkedIn Profile] | [GitHub Portfolio] | [Contact Number]

PROFESSIONAL SUMMARY Detail-oriented Full Stack Developer with a strong foundation in AI and Machine Learning. Expert in building end-to-end web applications, integrating deep learning models for real-world solutions like deepfake detection and automated report generation. Proficient in Python, Flask, and modern frontend technologies.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, HTML, CSS.
- **Frameworks:** Flask, Keras, TensorFlow, YOLOv8.
- **Tools:** VS Code, Git, OpenCV.
- **Specialization:** Computer Vision, NLP, Full-stack Web Architecture.

PROJECTS

Sentinel Forensics (FakeGuard AI)

- Developed a deep learning platform to analyze and detect AI-generated media and deepfakes.
- Designed a dynamic UI with technical animations for real-time analysis feedback.

AuraHire AI (Smart Resume Screener)

- Built an NLP-driven recruitment platform to evaluate candidate skill gaps and GitHub portfolios.
- Implemented automated scoring systems to streamline the hiring process.

ReportCare (Medical Reporting System)

- Created a secure platform for doctors to generate and verify official medical reports.
- Integrated a dedicated PDF generation engine for high-quality, exportable reports.

EDUCATION

- **Master of Computer Applications (MCA) in AI & ML** – Chandigarh University (Ongoing)
